INSTRUCTIONS FOR COMPLETING STALLION SERVICE REPORT

1. Every stallion owner must report all registered Shetland, Miniature, Show Pony or Hackney mares bred to his stallion during the year, including mares owned by himself and others. The reports must be filed promptly at the end of the breeding season, but not later than January 15th. If a mare and/or stallion is AMHA, Shetland or Falabella registered - and the owner intends to hardship that animal into the AMHR within the breeding year, then a report should be filed for that stallion or that mare should be included on the report with the appropriate registration number for the registry they are currently with, otherwise when a registration application is filed for a resulting foal after the sire or dam is hard shipped in, it will require a stallion report along with a late fee of \$25.00.
2. A separate report must be made for each stallion each year.
3. All registered mares bred (not just those in foal) must be listed, with the names of the owners of the mares, and the first and last dates of service.
4. The report must be signed by the owner of the stallion or his authorized agent (Owner Signature Card must be on file with the ASPC/AMHR/ASPR office). The address of the owner or agent should be included.
5. The stallion owner must give a completed, signed Stallion Service Certificate, giving the dates of service to the owner of each mare bred. If the mare is sold, the Stallion Service Certificate should be given to the new owner.
6. Certificates of Registration for foals will not be issued unless both the Stallion Service Report and Stallion Service Certificate are on file in the registry office. The dates, signatures and all information given on the two documents must correspond.
7. If a mare is covered by more than one stallion during the breeding season, Stallion Service Certificates giving the first and last dates of service by both stallions must be furnished.
8. If a mare is exposed or bred to one stallion, thirty (30) days must elapse before she can be exposed to a different stallion. If thirty (30) days does not elapse between exposures or breedings, DNA parentage verification will be required before the foal can be registered.
9. When a stallion is pasture bred to a mare, the stallion owner must furnish a statement certifying that there was no other stallion in the vicinity which could have covered the mare and give the date the mare was placed in the pasture with the stallion, as well as the date they were separated.
10. When a stallion or mare is leased, a copy of the lease must be filed with the ASPC/AMHR/ASPR, along with the name of the party who is responsible for signing the reports required by the registry office.
11. Effective for the 2014 breeding year, and after, there is a \$10 filing fee form reports filed by the deadline. The deadline is postmarked by January 15th following the breeding year.
12. A late filing fee is required for all reports postmarked after January 15th following the breeding year.
