AMHR NATIONALS PARTICIPANTS

Information from Oklahoma State Veterinarian on Vesicular Stomatitis!

Oklahoma restrictions on livestock and equine from Counties where VSV has been diagnosed in the last 30 days.

35:15-11-20. Requirements regarding vesicular stomatitis

Any livestock (equine, bovine, porcine, caprine, ovine, or cervidae) entering Oklahoma from a county where vesicular stomatitis has been diagnosed within the last thirty (30) days or a county that contains a premise quarantined for vesicular stomatitis shall be accompanied by a certificate of veterinary inspection dated within five (5) days of entry containing the following statement: "All animals identified on this certificate of veterinary inspection have been examined and found to be free from signs of vesicular stomatitis and have not originated from a premise which is under quarantine for vesicular stomatitis."

We also require a negative Coggins Test within 12 months and a CVI within 30 days unless the horse is from a VSV positive County.

All AMHR National exhibitors should be aware of the re-entry requirements for their state. Please check with your State Veterinary Board for details.

Currently there are no confirmed positive cases in Oklahoma although we do have a couple of investigations waiting testing results.
